

**Margin Call**  
*Token to save soul of trader*

THE TOKEN TO RECOVER YOUR TRADING LOSS

# WHITEPAPER

## Meaning and story behind Margin Call

MARGIN CALL project with symbol \$MC was born on May 19th, 2021, created by a Japanese millionaire whose account was liquidated on the Okex exchange. Before that, he used to trade very successfully on derivatives platforms. However, after the strong liquidity of the Bitcoin price on at the same dated - May 19th, his account was liquidated. He and a few of his developer friends gathered the remaining assets to create a project with the aim to save the trader's soul and recover your, they have created the new trend called: "Don't let the exchange spend your money, let's recover the trading loss together"

Most of the buyers of \$MC are those who have traded losses on major exchanges such as Binance, Okex, Huobi, Bitmex..., with the same goal and mission of "recover the trading loss together", they all buy this tokens and hold it. Their goal is that each person buys a little, holds a little bit and shares it with many people, then we can recover our trading loss together thanks to the strong increase in the price of the token that almost everyone also love this.

In addition to the financial meaning, \$MC also has a social meaning, as it regularly organizes airdrop programs for individuals who suffer from "margin calls" or heavy losses on exchanges, with our hope of sharing their pain. The people who receive the airdrop will also continue the sharing the goal of Margin Call, they will hold \$MC without selling, and share with many people the meaningful and mission of \$MC.

**Margin call –  
token for community and community is owner**

\$MC was born on May 19th, 2021, MC is the "saver" with "the lighthouse" will lead you to recover your trading loss and margin call. The founding team token has been locked for a year. Lock trading pool for 6 months in Dxsale.app, ensuring that the developing team cannot remove the pool, all games are fair, \$MC is token for community and community self-operated. \$MC will be listed in big exchanges with trillion of trading volume per day.

Lighthouse round	30%	1BNB = 300,000,000,000 \$MC	300,000,000,000,000
Listing price		1BNB = 200,000,000,000 \$MC	

## **Mechanism** *The token to recover your trading loss*

Margin call provide the smart mechanism of “recover your trading loss” in term of 3 aspects as below:

### **Strong benefit for token holder**

In each trade, the transaction is taxed a 12% fee, which is split in 3 ways

4% fee will be distributed by \$MC to all \$MC holders to create great value and benefit for holders. The more \$MC you own, the more \$MC you will be rewarded per each transaction. The longer you hold \$MC, the more profit you will receive.

### **Sustainable development**

4% fee will be added to the liquidity pool on pancake to ensure the sustainable development of \$MC. With this mechanism, \$MC will protect the liquidity volume for trader.

Liquidity pool will be locked in Dxsale in 6 months and will be listed on other big exchanges after Pancakeswap

### **Deflation mechanism**

4% fee will be used to buy back \$MC and burn in every transaction. With this smart mechanism, the token supply will be reduced thanks to burning function in each transaction

### **Dump Prevention Mechanism**

\$MC invent a new Dump Prevention Mechanism so the token's price always increases.

### **Transparency and Trust**

\$MC believe that Trust is the most crucial part of every project so our project will make everything as Transparent as possible to increase the Trust of our investor.
